

Dog and cat fur

Every year in Asia more than **2 million** dogs and cats are skinned alive for their fur. Since January 1, 2009 there is an import prohibition in Europe for dog and cat fur. **But mind you...** dog and cat fur is now being imported in Europe as imitation fur!!

Do you know that...

The production of dog and cat fur is much cheaper than imitation fur?

The fur is shaved, colored and bleached to make it look and also feel like imitation fur?

The skin is replaced by fabric or openwork fabric to make it look like imitation fur?

Fur tests are no longer reliable because the "real" fur is treated chemically?

The leather label possibly hides a dog or cat skin?

Races with the highest rate of being skinned alive are the Golden Retriever, Labrador, German Shepherd, Scottish Collie and the grey and red cat?

The Raccoon (dog) is skinned alive and that its fur is used mostly for the collars of coats?

**DO YOU WANT THIS BUSINESS TO STOP?
THAN STOP BUYING FUR
AND ALSO IMITATION FUR.**

**Subscribe as a volunteer
and fight with us**
